# Inventory and Software License Monitoring 2017 (1 Day)

## Course Overview

The *Ivanti Inventory and Software License Monitoring (1 Day)* class is designed for those looking to brush up on their knowledge regarding inventory gathering and management of software licenses. This class is taught live and includes the use of a live Endpoint Manager environment throughout the day. Students will also receive the Student Guide and Exercise Manual for the class.

## Course Objectives

By combining classroom training with scenario based hands-on exercises, students are empowered with the practical knowledge and skills needed to assure Inventory and Software License Monitoring can be implemented to achieve maximum ROI, such as:

- Understanding the value that the Inventory component offers
- Understanding the inventory scanning process
- Configuring inventory settings
- Changing inventory scanner setting and behaviors
- Creating forms for gathering custom data
- Discovering use cases for software license monitoring
- Using the software license and monitoring features
- Navigating the tools
- Creating reports
- Troubleshooting

## Course Duration

1 day (6 hours)

## Course Pricing

US: \$600 USD

UK: £500 GBP

## Delivery Method

This class is offered in an instructor-led format and is offered as a remote attendance course only. Students will apply concepts learned through the use of a virtual lab environment.

## Recommended Prerequisites

A beginning level of understanding of Endpoint Manager.

## Audience

This course is intended for:

- Systems administrators
- Networking professionals
- Customers, System Integrators, and Channel Partners with some Management Suite experience, who want to understand the Inventory and SLM component better
